Nelis' Dutch Village

The Proper Fit for Wooden Shoes

To Order your wooden shoes
in the proper size:

1. Trace your foot on a piece of paper. (one foot may be slightly larger, if so use the larger for best fit).
2. In centimeters, measure the outline from toe to heel.
3. To this measurement, add one cm for comfort.
4. The USA size conversion shown is typical. However, your careful measurement will more accurately determine your size.
5. If you are not sure about your size, call us and ask for the wooden shoe shop. (800) 285-7177.

Wooden shoes should not fit tightly. After you insert your foot, there should be a gap the width of your thumb behind your heel.

You should also wear a heavy pair of wool socks for comfort. If your shoes are a bit too large, you can add a second pair of socks to tighten up the fit.

The correct size: one thumb space

De juiste maat: één duim ruimte
